PROFESSIONAL SUMMARY

DevOps & Cloud Engineer transitioning from an engineering and operations background with hands-on experience in AWS, Linux, Docker, Kubernetes, Jenkins, Terraform, Git/GitHub, Bash Scripting, and CI/CD Automation. Skilled in cloud deployments, infrastructure automation, containerization, system reliability, and deployment automation through practical projects and internship experience.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, CloudWatch, Lambda)

DevOps & CI/CD: Jenkins, Git, GitHub, CI/CD Pipelines, GitHub Webhooks

Operating Systems: Linux (Ubuntu, CentOS, RHEL), SSH, Systemctl, Cron Jobs

Containerization: Docker, Docker Compose, Docker Hub, Multi-Stage Builds, Volume Management

Infrastructure as Code: Terraform

Container Orchestration: Kubernetes (Pods, Deployments, ReplicaSets, Services, NodePort, YAML Manifests)

Automation & Scripting: Bash Scripting, Shell Automation

Monitoring & Logging: AWS CloudWatch, Log Analysis, System Monitoring

Concepts: SDLC, Agile, CI/CD, High Availability, Scalability, Root Cause Analysis (RCA), Security Best Practices

PROJECTS

Automated Backup System on AWS (Bash + AWS S3)

- Developed an automated backup solution using Bash scripting and AWS CLI.
- Automated backups using Cron Jobs and Amazon S3 lifecycle policies.
- Improved backup reliability and reduced manual intervention.

Multi-Tier Application Deployment (Docker + AWS EC2)

- Containerized applications using Docker and optimized multi-stage builds.
- Deployed applications on AWS EC2 using IAM Roles and Security Groups.
- Configured Docker Volumes for persistent storage and deployment consistency.

CI/CD Pipeline Automation (Jenkins + Docker + AWS EC2)

- Built Jenkins-based CI/CD pipelines integrated with GitHub Webhooks.
- Automated Docker image deployment on AWS EC2 instances.
- Reduced manual deployment effort through CI/CD automation.

Kubernetes Nginx Deployment (Kubernetes + YAML)

- Deployed Nginx application using Kubernetes Deployment and Service manifests.
- Exposed application externally using NodePort Service.
- Managed Pods and application deployment using YAML manifests.

PROFESSIONAL EXPERIENCE

Novitas Webworks

DevOps Intern | Jan 2026 – Jun 2026

- Assisted in Linux server administration and AWS cloud infrastructure management
- Supported Docker container deployment and Jenkins CI/CD automation.
- Worked with Git/GitHub workflows, monitoring, and deployment processes.
- Monitored infrastructure performance, logs, and system reliability.

Independent DevOps Trainee | 2025 – Present

- Built hands-on projects using AWS, Linux, Docker, Jenkins, Terraform, Git, Bash Scripting, and Kubernetes.
- Practiced CI/CD implementation, cloud deployments, infrastructure automation, and DevOps best practices.

Tata Advanced Systems Ltd, Nagpur

Assistant Executive | Sep 2017 – Aug 2026

- Performed Root Cause Analysis (RCA) to resolve operational issues.
- Improved workflow efficiency through process optimization initiatives.
- Maintained AS9100 aerospace quality standards while coordinating with cross-functional teams.

EDUCATION

B.Tech – Mechanical Engineering

Dr. Babasaheb Ambedkar Technological University (DBATU)

CGPA: 8.77 / 10

Diploma – Mechanical Engineering

MSBTE

Percentage: 82.93%

CERTIFICATIONS

- DevOps & Cloud Computing Training – Skillecated, Nagpur
- Lean Six Sigma Blue Belt – SAKSHAM (TASL)
- Top 3 Performer Excellence Award – 5S Process Compliance
