PROFESSIONAL SUMMARY

DevOps & Cloud Engineer with hands-on experience in AWS, Linux Administration, Docker, Jenkins, Git/GitHub, Terraform, Bash Scripting, and CI/CD Automation. Skilled in cloud deployments, containerization, infrastructure automation, monitoring, troubleshooting, Linux server management, and DevOps best practices. Experienced in improving system reliability, scalability, operational efficiency, and deployment automation through practical project implementation and industry experience.

TECHNICAL SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, CloudWatch, Lambda)

DevOps & CI/CD: Jenkins, Git, GitHub, CI/CD Pipelines, GitHub Webhooks

Operating Systems: Linux (Ubuntu, CentOS, RHEL), SSH, Systemctl, Cron Jobs

Containerization: Docker, Docker Compose, Docker Hub, Multi-Stage Builds, Volume Management

Infrastructure as Code: Terraform

Container Orchestration: Kubernetes (Pods, Deployments, Services)

Automation & Scripting: Bash Scripting, Shell Automation

Monitoring & Logging: AWS CloudWatch, Log Analysis, System Monitoring

Concepts: SDLC, Agile, CI/CD, High Availability, Scalability, Root Cause Analysis (RCA), Security Best Practices

PROJECTS

Automated Backup System on AWS (Bash + AWS S3)

- Developed an automated backup solution using Bash scripting and AWS CLI.
- Scheduled Cron jobs and integrated Amazon S3 lifecycle policies.

- Reduced manual backup effort and improved backup reliability.

Multi-Tier Application Deployment (Docker + AWS EC2)

- Containerized applications using Docker and optimized multi-stage builds.
- Deployed applications on AWS EC2 using IAM roles and Security Groups.
- Configured Docker volumes for persistent storage and deployment consistency.

CI/CD Pipeline Automation (Jenkins + Docker + AWS EC2)

- Built Jenkins-based CI/CD pipelines integrated with GitHub Webhooks.
- Automated Docker deployment on AWS EC2 instances.
- Reduced manual deployment effort through CI/CD automation.

PROFESSIONAL EXPERIENCE

Novitas Webworks

DevOps Intern | Jan 2026 – Jun 2026

- Assisted in Linux server administration and AWS cloud infrastructure management.
- Supported Docker container deployment and Jenkins CI/CD automation.
- Worked with Git/GitHub workflows, monitoring, and deployment processes.
- Monitored infrastructure performance, logs, and system reliability.

Independent DevOps Trainee | 2025 – Present

- Built hands-on projects using AWS, Linux, Docker, Jenkins, Git, Terraform, Bash Scripting, and Kubernetes.
- Practiced CI/CD implementation, cloud deployments, infrastructure automation, and monitoring.
- Developed practical experience in DevOps workflows and automation best practices.
- Continuously learning advanced DevOps tools and cloud technologies.

Tata Advanced Systems Ltd, Nagpur

Assistant Executive | Sep 2017 – Aug 2026

- Performed Root Cause Analysis (RCA) to resolve operational issues.
- Improved workflow efficiency through process optimization initiatives.
- Maintained AS9100 aerospace quality standards while coordinating with cross-functional teams.

EDUCATION

B.Tech – Mechanical Engineering

Dr. Babasaheb Ambedkar Technological University (DBATU)

CGPA: 8.77 / 10

Diploma – Mechanical Engineering

MSBTE

Percentage: 82.93%

CERTIFICATIONS

- DevOps & Cloud Computing Training – Skillecated, Nagpur
- Lean Six Sigma Blue Belt – SAKSHAM (TASL)
- Top 3 Performer Excellence Award – 5S Process Compliance
